**You set
the course,
we provide
the drive.**

Successful **together.** What **AMT** has to offer.

01

Driven to innovate

Our extensive development competence and complete vertical range of manufacture make us an ideal partner every step of the way – from the initial product idea and prototyping to the production on an industrial scale. We operate independently of global supply chains, are able to react and develop quickly, and guarantee comprehensive innovative and cost-efficient solutions of the highest quality and with an outstanding supply performance.

02

We understand your needs!

Our decades of experience in our core target sectors allow us to understand your needs and to offer innovative solutions to meet them. We are a valuable partner because we understand the system as a whole.

03

A convincing product portfolio

Our comprehensive product range consists of compact, lightweight, energy-efficient and powerful drives that are tailored to meet your needs.

Auto Move **Technologies** – take it literally

Thanks to our all-in-one development process and our extensive development expertise, we are able to develop special drives together with our customers and get them ready for mass production. Using a targeted approach, our production and validation expertise allows us to quickly build prototypes that we test in the customer's product.

We have been developing and producing innovative industry and customer-specific drive solutions for the healthcare sector and beyond.

Our solutions are **versatile**

Our drive solutions are known throughout the industry as compact, lightweight, energy-efficient, powerful and individually adaptable. That is why they can be found in nearly all electric wheelchairs, stairlifts or stair climbers of the most renowned manufacturers.

With the know-how of 40 years of success, we provide our customers with intelligent and transformative drive solutions.

Quality management

“Our AMT drive solutions excel through perfection in terms of quality, effectiveness, smooth operation and efficiency.”

Enzo Viola,
Chief Executive Officer

Our mobility solutions defy expectations

Wheelchair

Together with AMT, provide your customers with the individual mobility that they deserve and want.

Stairlift

Greater convenience and a sense of comfort in the privacy of one's own home thanks to the drive solutions from AMT.

Agricultural technology

In the agricultural sector, AMT drive solutions are used in calf milk transporters, feed trucks or scrapers.

E-mobility

From standard electric and heavy duty vehicles to golf carts: AMT drives get everything going.

AMT drive solutions Versatile. Reliable. Powerful.

Compact, lightweight, energy-efficient and powerful – these are the characteristics that make AMT drive solutions so versatile. What ever you want to move, we have a drive for it.

DG drive serie

Our robust drive axle features various installation widths, motor speeds and reduction ratios; they accommodate large payloads and are mainly used in electric vehicles in rehab applications, in golf carts and in industrial transportation vehicles.

SRG angle drives

Thanks to highly efficient helical gears, our electric wheelchair-motors meet the highest requirements in terms of smooth operation and efficiency.

STM in-line drives

With a multi-stage spur gear, the compact design achieves an unmatched efficiency and, in spite of the in-line construction, does not take up too much room in wheelchairs thanks to the innovative gearbox design.

SLG disc rotor drives

Thanks to a compact and flat design, the powerful disc rotor drive with its three-stage spur gear is an optimal solution for stairlifts, stair climbers and cleaning machines.

SEG angle drives

We design needs-based angle drives with worm gear stages. In electric wheelchairs, this allows us to achieve the greatest possible efficiency. In the case of stairlifts, self-locking is often required.

Special drives

Thanks to our all-in-one development process and our extensive development competence, we are able to develop special drives together with our customers and get them ready for mass production. Using a targeted approach, our production and validation expertise allows us to quickly build prototypes that we test in the customer's application.

#wer

AMT – one **drive –
lots of movement**

move

Our drives offer independence:

For end customers by offering them a range of movement for an active life. For our customers in the development of electric wheelchairs, stairlifts and many other solutions.
